

MIYOSHI

Flower 2018

Welcome to MIYOSHI World of Flower

We are proud to offer you our new flower catalog 2018 and have great pleasure in presenting you our products for professional use. We offer high quality seeds, tissue culture plants and cuttings. Some highlights include NEW:

Lisianthus Largo Series
Aster Macaroon Series
Helleborus etc.

We sincerely hope that you will find some interesting products that will bring benefits and profits to your business. If you have any questions, please feel free to contact us anytime.

We look forward to being of service to you.

Lisianthus

(Eustoma)

Miyoshi has a very intensive breeding program for Lisianthus (Eustoma) and offers a number of different series for year round cultivation.

P7 – P18

Limonium

We are breeding and selecting *L. sinuatum* for both summer and winter performance. We look for high yield, nice branching composition as well as a wide range of color assortments.

P19 – P25

Lisianthus (*Eustoma grandiflorum*)

Please refer to page 66 for the product unit.

Double Flower

F1 Soiree Series

Soiree is our earliest flowering double series. The series is easy to flower even under the low temperature condition. The flower size is medium to large. Avoid planting this extra early Soiree in the hot period; they quickly come into flowering and stem length becomes short.

F1 Soiree Blue Picotee

F1 Soiree Pink Picotee

F1 Soiree Blue Blush

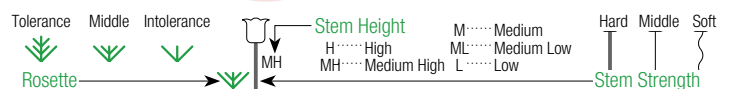

F1 Soiree Pink Blush

F1 Soiree Pink

F1 Soiree White

Double Flower 

 **F1 Bolero Series**

F1 Bolero series is early flowering and less susceptible to rosetting under warm growing conditions. Importantly the shape of blooms is also stable under heat. The series is adaptable to different cropping schedules from winter to summer. Sturdy stems and good vase life. White, Green, Blue Blush and Blue Picotee are available.

Pot & Bedding Plants

Double Flower

 **F1 Mazurka Series** Mazurka Wave White has good branching and uniform growing habits. The flower size is medium and petals are elegantly frilled or waved. It is easy to grow and a perfect yield producer. Some ivory flowers are segregated.

F1 Mazurka Wave White

F1 Mazurka Blue Picotee B

F1 Mazurka White

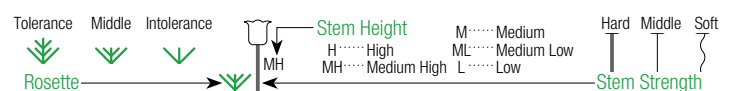

F1 Mariage

F1 Polka Lavender

Polka Lavender is an elegant lavender variety with large and full petals. The height is short but middle flowering and good for winter-spring production.

Double Flower

F1 Minuet Series

F1 Minuet Dark Purple and Minuet Apricot Rose have become very popular. They display many small double blooms with very attractive rose-like flower buds. They are in the intermediate flowering speed group. Apricot Rose grows slightly slower and taller than Dark Purple. The flower size of White Imp. is smaller. We have 5 varieties with excellent vase life.

Pot & Bedding Plants

Double Flower

F1 Diamond Peach

Diamond Peach is intermediate growing and best suited for spring-summer harvest. Medium to large blooms on tall rigid stems. Excellent vase life.

F1 Allemande White

Allemande White belongs to the intermediate flowering group and is suitable for harvesting from summer to autumn. Allemande White has large sized flowers and is admired for its best performance under hot climate conditions by keeping good doubleness and presents voluminous sturdy stems.

F1 Passacaglia White Imp.

The variety produces extremely large gorgeous flowers. To produce large flowers, disbudding work is essential. Remove small buds and ideally leave one bud on each flower branch. Approximately 5% ivory flowers are found. Passacaglia White Imp. belongs to the intermediate flowering group.

F1 Romance Series

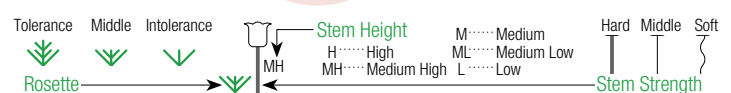

Romance Green is in the group of intermediate flowering speed. Romance Green has medium-large flowers. Well suited to spring-summer production.

Romance Green Imp. is a variety of green double large flowers with intermediate blooming speed. High temperature does not cause less petal count. Comparing with Romance Green, height is shorter. Good branching and voluminous. Plant style looks vigorous due to strong and straight stems.

F1 Romance Green

F1 Romance Green Imp.

Double Flower

F1 Chaconne Series

In addition to the series, we are introducing Chaconne White and Chaconne Yellow Imp.. Chaconne series belongs to intermediate to intermediate-late flowering group. It produces large flowers with thick petals which extend the vase life. The color of Chaconne Yellow Imp. is more intense and its frills on the petals are deeper than Chaconne Yellow. The growth is vigorous in Chaconne Green, Chaconne Yellow, and Chaconne Yellow Imp. and less fertilization is recommended for these varieties to avoid tip burns and stem breaks.

F1 Chaconne Yellow

Pot & Bedding Plants

Double Flower

F1 Polonaise Series

Three Polonaise varieties are available now. Polonaise White plus Polonaise Blue Picotee and Polonaise Green. Polonaise series belongs to the middle-late group and blooms small lovely rose-like flowers. Petal numbers hardly reduce under hot conditions. Good branching and good vase life.

F1 Polonaise Blue Picotee

F1 Polonaise Green

F1 Polonaise White

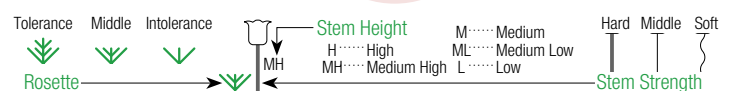

F1 Nightingale Series

We now have F1 Nightingale and F1 Nightingale Midi. Nightingale has larger blooms than Midi. These two varieties have attractive rose red flowers. They need good light condition to have good color appearance. Summer production is recommended.

F1 Nightingale

F1 Nightingale Midi

Delphinium

Other Cut Flower

Pot & Bedding Plants

Double Flower

F1 Jasny White

F1 Jasny White belongs to the intermiditate-late flowering group. It has good branching habit and produces voluminous flower stems. Jasny has medium sized flowers and the color is pure white. Petals are thick and round.

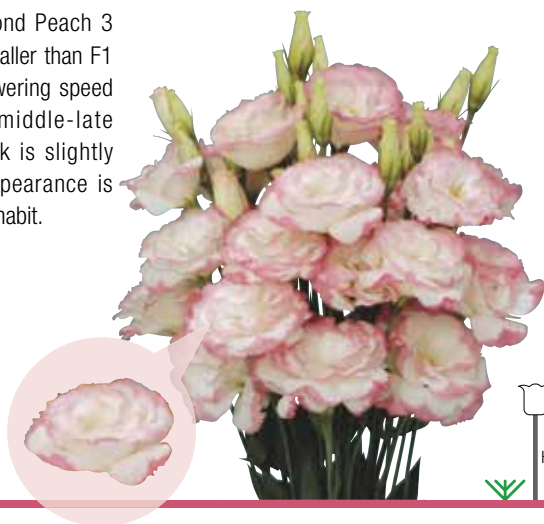

F1 Purple Flamingo

F1 Purple Flamingo is middle-late variety. Large sized flowers with thick petals and long vase life. Coloring starts when flowers are still buds. The growth is very vigorous and the plant maintains good height. Pay attention to leaf tip burn at the beginning of growth, also it is not well tolerated to rosetting.

F1 Diamond Peach 3 Imp.

The stem of F1 Diamond Peach 3 Imp. is more rigid and taller than F1 Diamond Peach 3. Flowering speed is same and in the middle-late category. Tint of pink is slightly darker and bicolor appearance is stable. Good branching habit.

F1 Marble Pink

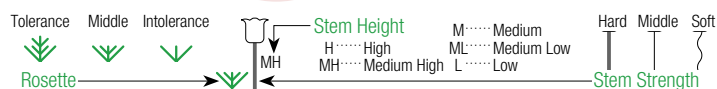

F1 Gavotte Yellow

F1 Vintage Blue Picotee NEW

Vintage Blue Picotee has very intense rim color and will be appreciated by flower users for its visual appeal. It belongs to the intermediate-late flowering group. Very attractive medium-large flowers with fewer branching count.

Double Flower

F1 Largo Series NEW

Largo series is available in three colors; Largo Blue Picotee, Largo Lilac Pink Picotee and Largo Pink Picotee. The series belongs to the intermediate-late flowering group for excellent performance through summer to autumn. It develops plants well and maintains good height and many branches. The most remarkable characteristic of Largo series is its flower. Larger flowers with unique rim colors will grab user's attention.

F1 Largo Blue Picotee

F1 Largo Pink Picotee

F1 Largo Lilac Pink Picotee

F1 Art Series

Art series is the latest flowering among our double Lisianthus varieties and best suited to summer-autumn production. Because of its slow growing characteristics, quality is perfect even when harvesting through the hot season. Stems are long and robust and it keeps very well in the vase.

Other Cut Flower

Pot & Bedding Plants

Tissue cultured *L. sinuatum*

Sprint Violet

Sprint Violet is selected for very early flowering, very high yield, its intense dark blue flowers and mainly winter production. The variety does require much less cold for vernalization.

Sunday Series

Sunday series is extra early growing and extremely high producer and well suited to winter production. Sunday consists of Violet and Lavender. The series is also resistant to botrytis. Branches grow upright and form an excellent shape.

Sunday Violet

Sunday Lavender

Prime Series

Prime series is early flowering and suited to winter production. The series is well branched with small wings and its strong stems grow upright. Crops are easy to harvest. Prime series is a very high producer. We now replaced Prime Lavender with new Prime Lovely Pink.

Prime Violet

Prime Lovely Pink

Tissue cultured *L. sinuatum*

Earth Series

Earth series has big calyces which open well. It produces tall and very high quality stems that grow upright and straight into a perfect shape. Crops are easy to harvest and suitable for winter production.

Earth Ocean

Earth Pink

Limonium

Matthiola

Delphinium

Other Cut Flower

Pot & Bedding Plants

Crystal Yellow

Attractive bright lemon yellow variety with perfect volume and suitable for all seasons. Crystal yellow is susceptible to botrytis so good ventilation and appropriate prevention are required.

Rose Wine

Rose Wine is a new early flowering variety suited for winter forcing cultivation. Calyces open very well and stems grow straight up. Vivid intense rose color.

Tissue cultured *L. sinuatum* 

 **Clear Snow**

Clear Snow is pure white and an early flowering variety suitable for winter production. The variety has an upright branching habit that makes cropping easy.

 **Luster Amethyst**

Luster Amethyst has shining bright purple calyces that open very well. Excellent volume with big brushes. This variety is slightly slow and suitable for summer production.

 **Noble Violetta**

Noble Violetta has very intense dark blue brushes. The variety belongs to middle to late flowering speed category with excellent summer performance producing high quality stems.

 **Dynamic Violet**

Intense violet color. Large brush and thick stems give heavy quality to cut flowers. Good stem length and branching even under the hot climate condition. It is late flowering speed and suitable for summer production.

Tissue cultured *L. sinuatum* & *L. sinuatum* from Seed

Exotic Tall Blue

Exotic Tall Blue is a middle-late flowering variety and suited for summer production. It produces high quality stems not only for 1st flush but also 2nd flush with long stems and good branching habit. Apply less fertilizer and water as the growth is very vigorous.

New Lineup

Lisianthus

Limonium

Matthiola

F1 Smash Series

F1 Smash series grows much more uniform than OP varieties and almost all flower stems are harvestable without loss. Productivity is very high and comparable to TC varieties. The series is early and suitable for winter production.

Matthiola incana

(Stock)

A wide assortment of quality Matthiola varieties from Mr. Kurokawa Japan for professional cut flower growers worldwide.

Spray Quartet Matthiola is now spreading to the global flower market.

P 27 – P 35

Delphinium

Waltz and Trick series are interspecific hybrids; bred and selected for bigger florets, extremely high production and good vase life. They are all propagated by tissue culture.

P 36 – P 41

Matthiola incana (Stock)

Please refer to page 66 for the product unit.

All Double Spray & Standard

Spark Series (Spray Type)

In addition to Quartet series, all double spray Spark series is available as all double flowers without double single selection. Over 90% will be double flowers. Cream yellow and white are available. Compared to Quartet White and Yellow II, Spark White II and Yellow are about 10 cm taller but flowering is delayed by 10-14 days respectively.

Spark White II

Spark Yellow

Arrow Series (Standard Type)

All double Arrow Series is now available in two varieties. Early Arrow White is earlier in flowering than the original Arrow White. The flower color of both varieties is pure white. The level of firmness of the flower stems is sufficient.

Early Arrow White

Arrow White

Revolution Series (Standard Type)

Mr. Kurokawa has bred high quality, all double varieties. Revolution White II and Revolution Yellow II are very early flowering. Without selection work, over 90% will be double flowers.

Early Iron Pink

Iron Series

Iron series is highly preferred because of its excellent quality. As in the name of Iron, the stems are like iron and very robust. It produces excellent tight flower spikes and the top of it does not stretch. Iron needs more water than other varieties to have marketable length.

Kid Yellow

Kid Series

Kid series is very early flowering which enables early harvesting and it is even earlier than Iron series. Kid White is one month earlier than Iron White and 10 days earlier than Kid Yellow. Kid series is not only fast but also the stem is rigid and the spike is tight just as good as Iron series.

* Please contact us for the best sowing time in your region to avoid premature flowering as the series is very early flowering.

Comment	
I	Pinching timing: When very top 2-3 buds start coloring. To get height, never dry-out water during growing.
II	Early sowing may cause time lag in flowering. To get height, never dry-out water during growing.
III	Pinching: Leave more than 10 true leaves. It's branching type, but it can be treated like spray type.
IV	Pinching: Leave more than 10 true leaves.
V	Avoid sowing in hot period. (Hot temperature may cause blasting)

The description is made under Japanese circumstances and may not be adequate of different climate areas.

Waltz Series

After introduction, this series is well accepted and consumed worldwide. Waltz series was selected for larger single flowers and extremely high production. Clones are produced by tissue culture and performance and appearance are very uniform. This series keeps producing without dormancy and achieve higher production than other varieties.

Sea Waltz

Sky Waltz

Tango Dark Blue

Tango Dark Blue has double flowers. Compared with Sea Waltz, Tango's plant height is rather shorter but flowering speed is faster. Tango Dark Blue has excellent vase life.

Belladonna

Trick Series

Having unique colors, Trick group is a perfect producer. New shoots continuously develop and grow up. The size of flower spikes is rather small in length and width. Trick series produces ideal quality stems for mixed bouquets. Vase life is excellent with proper pretreatment.

Trick

Trick Pink

Trick Yellow

F1 Prism Series

This series is early flowering among F1 hybrid Delphiniums. The growth is more vigorous than conventional Belladonna types and produces very uniform first flush. The productivity is high with good branching, numerous florets, uniform flower colors and plant shape.

F1 Sea Prism

F1 Sky Prism

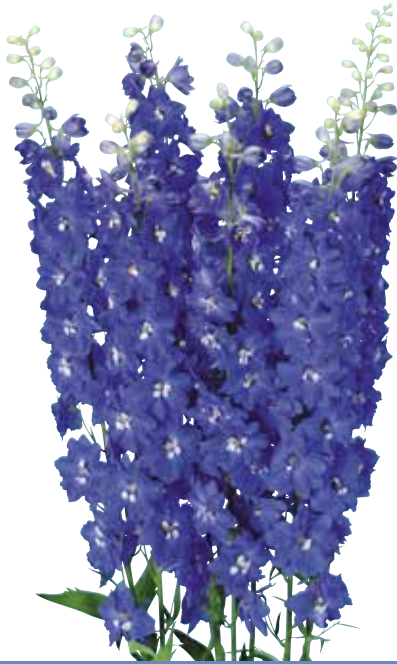

F1 Snow Prism

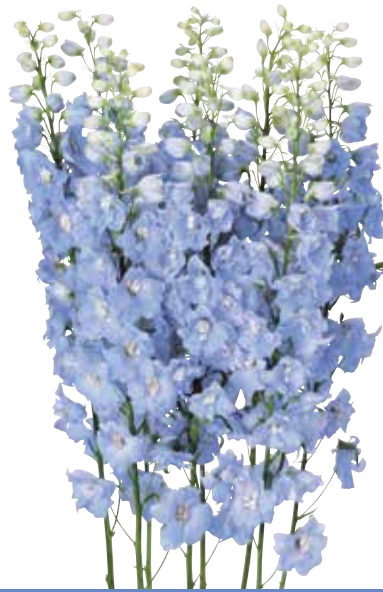

Cultorum & Belladonna  F1 Ariel Series

Ariel series flowers earlier than Triton Series and hardly becomes rosette. Ariel White is the earliest flowering among our F1 elatum type Delphiniums. Flower size is approximately 7 cm and the color is pure white. Plant height is not very tall and it should not be planted in the hot period. Once it starts flowering, buds open rather quickly from bottom to top. Harvest at the early flowering stage.

F1 Ariel Blue

F1 Ariel Light Blue

F1 Ariel White

 F1 Triton Series

F1 Triton series is very uniform in size and color. Growing speed is early and production is high. Excellent stem quality with good shaped double flowers closely arranged on cylinder shaped spikes. Triton's tight spikes are more slender than other D. cultorum or elatum varieties. This supports economical transportation and various flower usages and more consumption. Currently three colors are available; Dark Blue, Light Blue and a fabulous lavender color. Triton Lavender has the biggest flower size of our entire Delphinium assortment. Flowering speed is earlier than Triton Light Blue and slower than Dark Blue.

F1 Triton Dark Blue

Brassica oleracea (Ornamental kale)

Brassica oleracea (Ornamental kale)

Our Brassica varieties are specially selected for "as Flowers" which will change the ordinary image of Brassicas. And we are proud to introduce four more varieties in addition to our unique line. F1 White Lady and F1 Peach Lady are additional colors to the F1 Lady Series which has fringed and voluminous leaves and gorgeous look. F1 Altair is a serrated-leaf type and able to maintain a good stem length of 80-90cm. The dark brownish purple leaves of F1 Black Leaf are attractive and eye-catching.

Antirrhinum majus (Snapdragon) & Amaranthus cruentus

F1 Fair Series

F1 Fair is an extra early flowering series for winter production. It has a heavy flower spike with tightly spaced florets and each floret is large. Best planted when it cools down to gain enough stem length. In warm conditions, it flowers short.

F1 Fair Rose Pink

F1 Fair Deep Pink

F1 Fair Pure White No.2

F1 Fair Yellow

F1 Bridal Series

F1 Bridal series is early to intermediate flowering and also bred for quality flowers and good vase life. Bridal White No. 4 is an improved version for a better second flush.

F1 Bridal Light Yellow

F1 Bridal White

F1 Bridal White No.4

Amaranthus cruentus

Hot series for sales from summer through late autumn. Amaranthus is originally from India and prefers warm and sunny conditions. The crop is mainly for outdoor production.

Hot Chili

Hot Biscuit

Ammi majus (White Lace Flower)

Energy saving crop for popular bouquet filler, arrangements and decorations.

Carthamus, Capsicum, Centaurea & Cosmos

Carthamus tinctorius Orange Red

Carthamus tinctorius Orange Red has round shape leaves. Bristles are retarded and easier to work with.

Gold

Gold is approximately 1 week slower than Orange Red but grows taller and has better volume.

Centaurea C. cyanus Hayate

Mix of 55% blue, 20% pink, 10% red and 15% white. Early flowering selection.

Capsicum annuum

Black Ace

Black Ace produces long and thin fruits. Very impressive color in a lustrous black. Fruits grow bunch at the top.

Cosmos

Cosmos is a short cropping product, 60-90 days from sowing to harvest. Versailles and Afternoon White are tetraploid and flowers are very large.

Rose Queen

Orange Queen Imp.

Orange Queen

Yellow Queen

Celosia & Arrangement® Celosia

Celosia Green Sango

Light green Celosia and much faster flowering than Martine series. It is suited for non pinching cultivation for single stem harvest. The variety is not tolerant to diseases. Extra care is recommended including good ventilation and spraying for pests and diseases especially for forcing culture in the greenhouse.

Celosia Crystal Beauty

Very attractive metallic orange color. Color becomes darker from bottom to top. The color of leaves and stems are light yellowish green. This variety is suited for both pinching and non pinching cultivation. The latter produces a very large flower head that may be interesting and could be unique flower material.

Arrangement® Celosia

Available in light pink to dark rose, we have arrow shaped Arrangement® Celosia. They are very nice for making basket decorations and arrangements.

Ruby Parfait

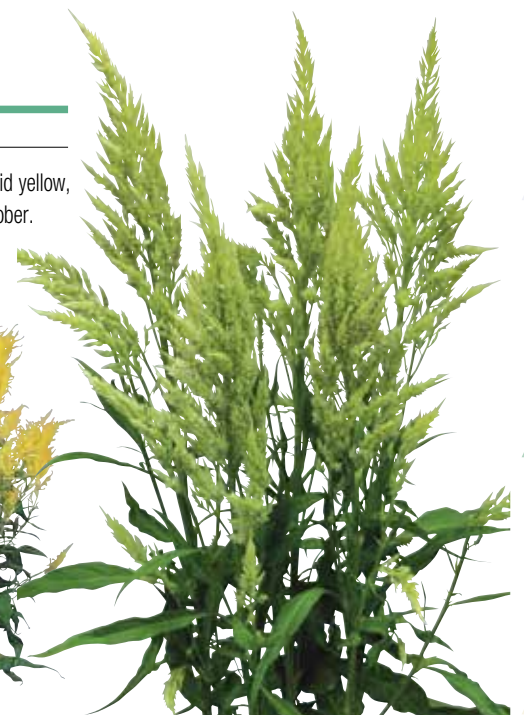

Roseberry Parfait

Sylphid

Lime green feather Celosia is excellent as a green bouquet filler as well as for all kinds of arrangements. Sylphid responds very well to light and temperature. In the greenhouse with lighting and heating, winter production is possible.

Durian Series

Durian is very popular among Arrangement® Celosia with an assortment of vivid yellow, golden and red. This series is a late type and flowering time is September-October.

Durian Red

Durian Golden

Durian Yellow

Dianthus, Gypsophila paniculata etc.

Calendula officinalis Nakayasu

Full double Calendulas are for spring cut flowers.

Didiscus caeruleus (Blue Lace Flower) Lovely Pink

Lovely Pink has brighter pink color than other pink Didiscus. The color appears clearer especially under the cool condition. Long-day flowering Didiscus needs lighting for winter production.

Dianthus Niikurabeni

Flower inflorescence is very large and flower color is vivid scarlet red. It is early and tall growing variety. This variety needs vernalization for flower initiation.

Dianthus barbatus Temarisou

Temarisou or called Green Trick or Green Ball in the different regions does not form any flowers. With such a characteristic, vase life is excellent and now essential for flower bouquet and arrangement. The Flowering is forced by long day and high temperature. More than 10 stems are harvested by cultivating from Autumn to next Summer.

Gypsophila paniculata Zinzi Discovery

Zinzi Discovery presents abundant small florets with the excellent vase life. The long side branches grow straight up from the base of the stem. The following benefits derive from this characteristic. Harvesting is easier without branch tangling. More stems can be packed with less stem breaking and less flower scattering. It is suitable for a long transportation.

Helianthus, Tweedia caerulea, Dahlia etc.  **Helianthus annuus Lemonade** 

Lemonade is double variety with bright yellow color. Double flower percentage is excellent without cropping loss. Flowering speed is same as Tohoku Yae ; it takes about 80 days from sowing to harvest.

**Iberis umbellata Candytuft** 

Candytuft flowers in spray form with 4-5 blooms of red, pink, violet or white. With heating and lighting, production continues throughout winter. Very good vase life.

**Tweedia caerulea**  (Oxypetalum)

Tweedia is a half hardy perennial and can be grown for 2-3 years by avoiding freezing in winter. It continues to produce through winter with minimum temperature of 15°C. Excellent material for bouquets and flower decoration. Approximately 50% semi double, 25% double and 25% single flowers appear from both Pint White Double Mix and Blue Double Mix.

 **Pint White Double Mix** **Blue Double Mix**

Dahlia **Hamilton Jr.** 

Flower Type: Decorative.
Best selling Orange Dahlia in Japan. Sturdy stems hold flowers very well.

**Mitchan** 

Flower Type: Decorative.
Best selling Rose Dahlia in Japan. Petals are thick.

Dahlia

Dahlia

Moon Stone

Flower Type: Decorative. Light lavender. Small flower and suited for arrangement with other flowers. The color is stable throughout the year.

Orange Stone

Flower Type: Decorative. Strong flower petals extending the vase life. Less open centers. Flower color may fade when cultivated under the low light intensity condition.

Portlight Pair Beauty

Flower Type: Decorative. An elegant mix of orange against white at their tips. Bicolor is more stable than existing varieties.

Rose Quartz

Flower Type: Decorative. Medium – large flower size. Vivid rose color is stable throughout the year.

Saisetsu

Flower Type: Decorative. Flower size is Medium-Large with good volume. Flower color is pure white and popular for the bridal use.

Asahitemari

Flower Type: Ball. Red color is stable throughout the year even under low light and temperature condition. Petals are thick and vase life is good. Excess fertilizer makes stems too thick.

Garnet

Flower Type: Semi-Cactus. The color is stable throughout the year even under low light and cold condition. Garnet is more heat resistant than Nessyou.

Dahlia

Nessyou

Flower Type: Semi-Cactus.
Impressive flaming red variety.
The flower size is middle and good cut flower variety.
Under low light and/or cold condition, the color changes to red orange.

Yellow Quartz NEW

Flower Type: Semi-Cactus. Cream yellow. Less susceptible to petal damages compare to yellow varieties in general. Less open centers.

Kokuchou

Flower Type: Semi-Cactus.
Attractive blackish red and very large gorgeous flower.

Pink Quartz

Flower Type: Semi-Cactus.
The variety is characterized by its bright clear pink color with no bluish tone.

Pot & Bedding Plants

Myosotis alpestris, Rumohra adiantiformis etc.

Myosotis alpestris Nano Series

Nano Blue

Nano White

Myosotis is commonly known as a bedding plant. Nano grows slightly taller. Its stems and flowers are thicker and bigger respectively. This variety can be forced for winter flowering with the usage of heating.

Ricinus communis Mizuma

Unique flower arrangement material. Clear bright red Miyoshi selection.

Silene armeria Sakura Komachi

Small 1 cm across florets compose lovely 5 cm light pink clusters. Year round sales are possible with heating and lighting.

Rhodanthe manglesii Maculata Rose

Bright pink with yellow center with reddish purple ring.

Rumohra adiantiformis

Mild (Leather Leaf Fern)

Mild has received the high appraisal because of a little number of spores and its excellent shiny leaves.

Pot & Bedding Plants

MIYOSHI offers seeds of Pot & Bedding Plants including F1 Catharanthus roseus, Delphinium, Matthiola and Senecio. Senecio Angel and Wink, series are very early and suitable for late autumn / early winter production.

P59 – P65

Pot & Bedding Plants

Please refer to page 66 for the product unit.

Delphinium & Celosia

Delphinium

Six dwarf Delphinium varieties for pot and bedding plants are available with the color range of dark blue, blue, light blue, light lavender, light pink and very light pink. The flowers bloom upwardly as there are no spurs on the buds. Cool Mint is the earliest in flowering followed by Aqua Blue, Mint Blue, Tiara Blue. The latest flowering varieties are Fantasista and Milky Mint. The flowering speed difference between the earliest Cool Mint and the latest Milky Mint is 1 – 2 weeks depending on the climate.

Mint Blue

Tiara Blue

Aqua Blue

Fantasista	Light pink	5.5			○	45cm	5
Milky Mint	White	5.5			○	40cm	4

Branch 5 <--> Few 1

Capsicum annuum Hit Parade

The plant is dwarf and spread wide. Fruit is small and placed upright. Starting with purple, the color of fruit changes to orange and then red. It is suitable for pot and bedding plants.

Celosia Summer Lavender

Summer Lavender is producible through spring to autumn because of its free flowering habit. The color is lighter during hot summer period but becomes clear darker rose when it gets cooler. It is suitable for growing in the different size pots. In the garden, the plants spread 45 cm with height 80 cm.

Brassica oleracea (Ornamental kale)

Brassica oleracea (Ornamental kale)

These flowering Kale varieties are suitable for pot and bedding plants as well as landscaping. Harmony and Rias have very sharp lobing leaves. Harmony is more red to deep pink color mixture with white. Usually Rias plants split half white and half red. F1 Shirozugin No.1 and F1 Akazukin No.2 have finely fringed leaves and F1 Shiraho and F1 Benikagami do slightly waved leaves. They are all very cold hardy plants.

F1 Shiraho

Feather	Harmony	Mix (Pink Red, Red, White)		○			5
	Rias	Mix (Red and White)		○			5

Strong 5 <-> Weak 1

Catharanthus roseus (Vinca)

Cocktailina Series

Cocktailina series presents unique color varieties: Apricot Fizz, F1 Blue Moon and F1 Red Eyes. The characteristics including growing habits and plant form are similar to Pacifica XP series. It is recommended to pinch the plant.

Apricot Fizz

F1 Blue Moon

F1 Red Eyes

F1 Merry Go Round Series

No vincas extremely sturdy like this series have ever existed. The plants establish very well and are fairly resistant to rain. They grow up to more than 70 cm in summer. This tall growing Merry Go Round would have a few branches at the beginning but grows very vigorously later on. Large pots are suited to grow these varieties. This jumbo vinca needs more fertilizer than other vincas.

Matthiola incana (Stock)

Baby High Double Series (All Double type)

Baby High Double series is all double type and 90% double flowers without double-single selection. Take the extra work away while enjoying the same characteristics of Baby series such as very early flowering, rigid stems, vigorous branching habit and long flowering time. Colors are available in White and Cream.

The description is made under Japanese circumstances and may not be adequate for different climate areas.

GH=Green House

Baby Series

This very early series has well-branching, unusually hard stems and hairy leaves that can be grown relatively compactly without use of growth retardants. Branches grow spikes early resulting in a compact, balanced form with the main spike. Flowers will bloom for 10 weeks with no pinches and 55% chance to be double-flowered.
